

Inland Empire Utilities Agency Board of Directors

Acknowledges Linko Data Systems as Supplier of the Year

For Immediate Release

October 5, 2009

Inland Empire - At its May 20, 2009 board meeting, the Inland Empire Utilities Agencies (IEUA) Board of Directors recognized Linko Data Systems, Inc., (Linko) as the Agency's *Supplier of the Year* for calendar year 2008.

Linko was recommended by the Agency's Pretreatment Information Management Systems (PIMS) (www.linkodatasystems.com/industrial-pretreatment-software.html). The new software tracks permit compliance, laboratory data, and ensures enforcement action is both timely and accurate.

"Linko's CTS-SQL software results in significant efficiencies for the Agency, as the software automatically identifies violations that are both time-consuming and difficult to identify manually," stated IEUA Board President Terry Catlin. "The increased efficiency achieved through this software installation has been a tremendous benefit to the agency," continued Catlin.

During the Agency's January 2009 Audit, the Environmental Protection Agency's (EPA) contractors were impressed by the software and its capabilities. "Linko Data Systems outstanding customer service, training and continued support is to be commended," said Catlin.

#####

IEUA is a municipal water district which distributes imported water from the Metropolitan Water District of Southern California, and provides municipal/industrial wastewater collection and treatment services to more than 850,000 people within a 242-square mile area in the western portion of San Bernardino County.

#####

Linko Data Systems, Inc., is the leading supplier of industrial-pretreatment (www.linkodatasystems.com/industrial-pretreatment-software.html) and Fats, Oil and Grease

(FOG) program management software (www.linkodatasystems.com/fog-software.html) and data management services. Since 1996 Linko has exclusively served the municipal source control market. Linko hires staff with direct experience in wastewater, pretreatment, fats, oil and grease control software development and customer service. Linko's success stems from the easy to use software, accurate, timely customer support and experience gained from an industry leading 300 software implementations.
