

**PUBLIC INFORMATION NOTICE #13
FOR THE CONSTRUCTION OF THE
930 ZONE RECYCLED WATER PIPELINE
EN13023**

DATE: January 23, 2014

Dear Resident:

The Inland Empire Utilities Agency (IEUA) would like to apologize for any inconvenience caused by the placement of our recycled water pipe and equipment along Daisy Drive.

We are currently addressing a design issue due to differing site conditions and we want to protect the stability of the English Channel's embankment as well as existing utilities prior to beginning work.

If you have any **questions about the construction project or wish to receive weekly e-mail updates, please contact Michelle O'Brien at 909-993-1501 or mobrien@ieua.org**. For construction updates, please visit www.ieua.org.

Benefiting the residents and businesses of Chino Hills and Chino, this project will provide recycled water as an additional source of water for landscape irrigation use and groundwater recharge. This project will save approximately 90 million-gallons per year of drinking water, while helping to drought proof IEUA's service area, help to keep the cost of water low, and provide a reliable source of alternative water. Funding for this project has been provided in full or in part through an agreement with the State Water Resources Control Board and the Environmental Protection Agency. The contents of this document do not necessarily reflect the views and policies of either the State Water Resources Control Board or the Environmental Protection Agency, nor does mention of trade names or commercial products constitute endorsement or recommendation for use. (Gov. Code § 7550, 40 CFR § 31.20.)
