

**PUBLIC INFORMATION NOTICE #9
FOR THE CONSTRUCTION OF THE
930 ZONE RECYCLED WATER PIPELINE
EN13023**

DATE: December 11, 2013

Dear Resident:

The Inland Empire Utilities Agency (IEUA) in cooperation with the City of Chino Hills has begun construction of a recycled water pipeline and reservoir. These projects include a new 3.5 million-gallon reservoir nestled in the hills between Galloping Hills Road and the equestrian/pedestrian trail to the North. A portion of the pipeline alignment includes Bluebell Drive where it will go along English Channel, and exits at Peyton Drive and Eucalyptus. The pipeline will cross under Peyton Drive, and will travel along the drainage ditch located between Galloping Hills Road and the Chino Hills Community Park and along the equestrian/pedestrian trail to connect to the reservoir. These projects will provide recycled water as an additional source of water for landscape irrigation use and groundwater recharge.

The Inland Empire Utilities Agency's (IEUA) contractor is laying recycled water pipe along English Channel beginning the week of December 9, 2013. The work locations will be within IEUA's easement along English Channel adjacent to Bluebell Drive, Daisy Drive, Foxglove Drive, Honeysuckle Avenue, Sambar Street, Reservoir Place, and Tact Court.

HOMEOWNER'S ACTIONS: Safety is our main concern and we ask for your assistance during this project by keeping children and pets away from work areas and observing all "Closed Access" signs. **Please do not access the construction area via your backyard or cross the channel.**

WORK HOURS: 7:00 a.m. – 3:30 p.m.

POSSIBLE IMPACTS: Temporary Truck and Equipment Noise. Noise levels will comply with the City's noise ordinance limits of construction.

Benefiting the residents and businesses of Chino Hills and Chino, this project will provide recycled water as an additional source of water for landscape irrigation use and groundwater recharge. This project will save approximately 90 million-gallons per year of drinking water, while helping to drought proof IEUA's service area, help to keep the cost of water low, and provide a reliable source of alternative water. *Funding for this project has been provided in full or in part through an agreement with the State Water Resources Control Board and the Environmental Protection Agency. The contents of this document do not necessarily reflect the views and policies of either the State Water Resources Control Board or the Environmental Protection Agency, nor does mention of trade names or commercial products constitute endorsement or recommendation for use. (Gov. Code § 7550, 40 CFR § 31.20.)*

If you have any **questions about the construction project or wish to receive weekly e-mail updates, please contact Michelle O'Brien at 909-993-1501.** For construction updates, please visit www.ieua.org. The City of Chino Hills website at www.chinohills.org will also provide you with a link to IEUA's website.
