Appendix D – Dry Year Yield Conjunctive Use Program

Appendix E – Definitions

Preface
FY 2009-2010 Water Use Summary Report

For a third year in a row, water use by the Inland Empire Utilities Agency (IEUA) member agencies has significantly declined. IEUA's member agencies overall water use has decreased approximately 32,000 acre-feet since FY 2006/07. This can be largely attributed to IEUA and its member agencies' public education, water use efficiency programs, ordinance enforcement and the economic downturn.

IEUA Member Agency Overall Water Use Trend

The continuing downward trend in overall water use is an excellent indicator of how well the IEUA member agencies have responded to the current water supply challenges including Judge Wanger's Delta Decision which significantly restricted diversions from the Delta, the Governor's declaration of a Statewide Water Emergency, MWD's implementation of a Water Supply Allocation Plan, MWD's call for stored water under the Chino Basin Dry Year Yield (DYY) Program and MWD's call for both voluntary conservation and implementation of mandatory water conservation ordinances.

In response to these growing water supply challenges, IEUA and its member agencies' have made aggressive efforts to diversify and maximize local resources and water conservation. These efforts have better prepared the service area to cope with the current imported water supply constraints.

- IEUA member agencies continued to implement MWD's water conservation ordinance requirement;
- IEUA member agencies continued to implement mandatory water use restrictions and activated their water supply shortage contingency plans (Water Reduction Stages), consistent with the IEUA Regional Urban Water Management Plan;
- IEUA member agencies successfully complied with MWD's Water Supply Allocation Plan by reducing demands by more than 35,000 AF below that of what was required;
- Over the DYY Program's twelve month period (May 2009 – April 2010) IEUA DYY Program participating agencies successfully pumped 31,047 AF (over 100% of IEUA's

- obligation of 31,000 AF) from the groundwater storage account and reduced their direct deliveries of imported water by 37,321 AF (over 100% of IEUA's obligation of 31,000 AF);
- The IEUA Recycled Water Program expanded its connected demand to over 32,000 acre-feet/year. IEUA and its member agencies also increased the recycled water usage by over 8,500 acre-feet (over 50%), giving a total of over 24,500 acre-feet in FY 2009/2010 (this includes direct reuse and recharge); and
 - The Chino Desalters also continued to maximize production, as they produced just over 25,000 acre-feet, of which IEUA member agencies used approximately 15,000 acre-feet.

To ensure adequate water supplies in the future, IEUA and its member agencies will continue to make aggressive efforts to diversify and maximize local resources and water conservation.

- In coordination with Chino Basin Watermaster, IEUA and its member agencies updated the Chino Basin Recharge Master Plan, summarizing the projected water demands and required recharge facilities and replenishment water needed to meet those demands;
- IEUA and its member agencies developed a Long Term Regional Water Use Efficiency Plan that provides the guidance needed for the development of new cost-effective water use efficiency programs;
- IEUA and its member agencies will continue working towards completing its Recycled Water Three Year Business Plan, which will give IEUA the ability to deliver 50,000 AFY of recycled water; and
- IEUA and its member agencies will continue working towards completing the Phase III expansion of the Chino Desalters, which will increase capacity from 24,600 AFY to 40,000 AFY.

With the uncertain future of imported water supplies, IEUA and its member agencies will continue to invest in local supplies and water use efficiency programs to ensure a reliable water supply.

IEUA would like to thank the cities, retail water agencies and Chino Basin Watermaster for their assistance in compiling the data contained in this production report.

SECTION 1

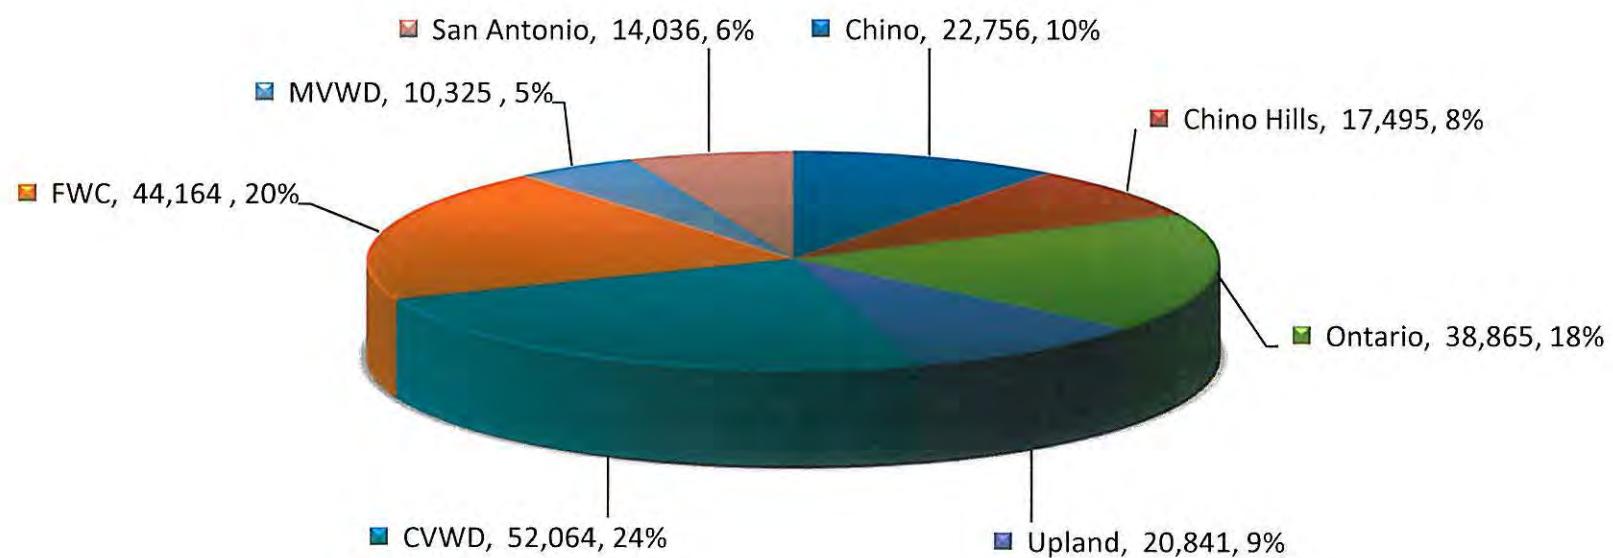

This section contains water resources data from FY 2009-10, by IEUA member agency.

- **Note:** Monte Vista Water District delivered 6,155 AF of Chino Basin groundwater to the City of Chino Hills. This is reported in Table 1 under the City of Chino Hills. This is also reported under the City of Chino Hills throughout the whole report.
- **Note:** Monte Vista Water District delivered 4,016 AF of imported water to the City of Chino Hills. This is reported in Table 1 under the City of Chino Hills. This is also reported under the City of Chino Hills throughout the whole report.

Total IEUA Service Area Water Used For FY 2009/2010

Total IEUA Service Area Water Used For FY 2009-10

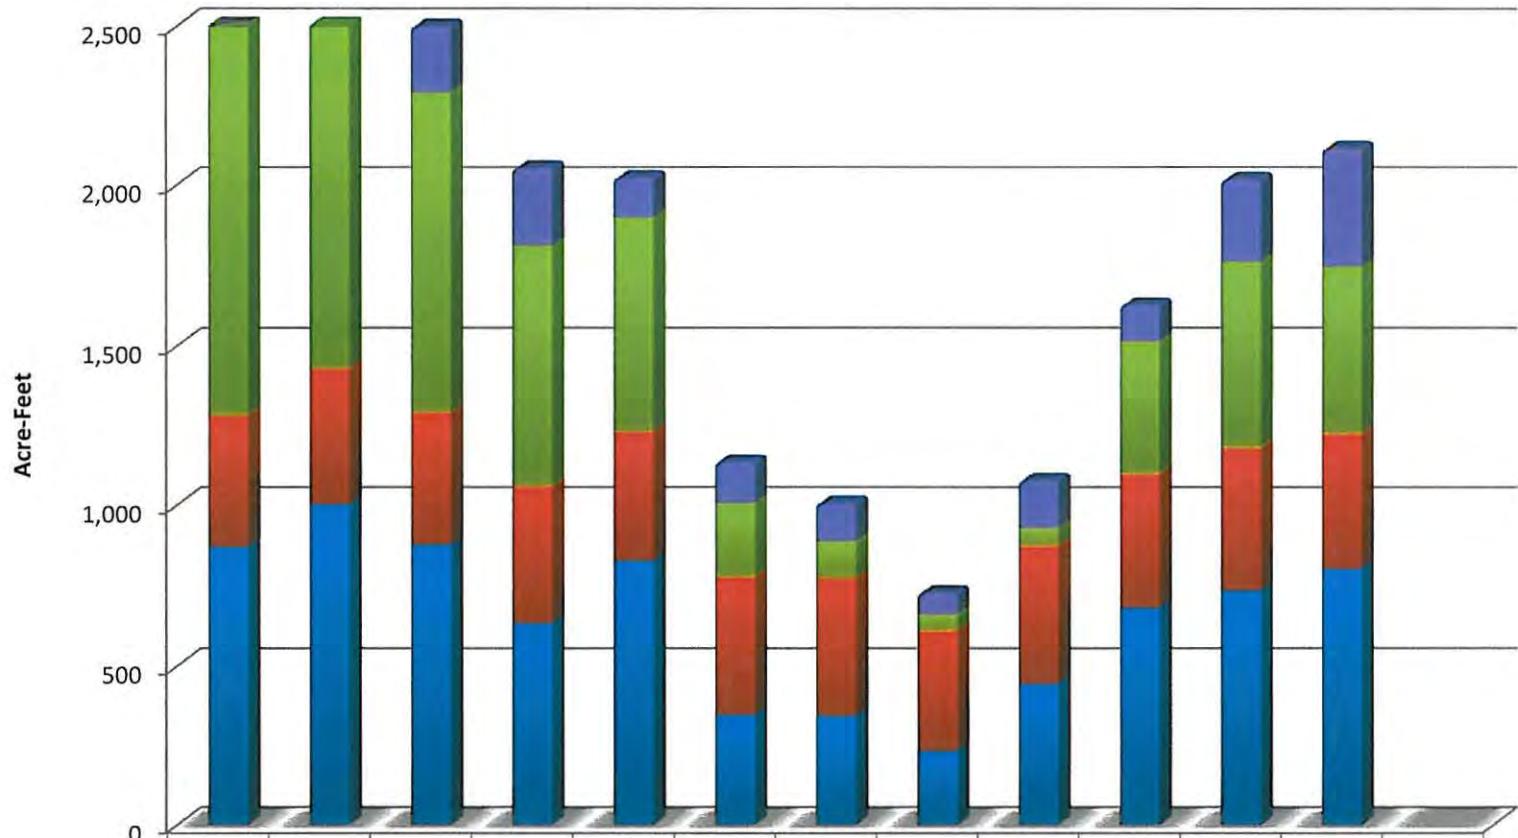

SECTION 2

This section contains water resources data from FY 2009-10 and 5-year water use, by agency. The following section contains water use data from each individual IEUA member agency. Each agency will have its own sub-section that contains data about FY 2009-10 water use, including the water pumped out of the MWD Dry Year Yield groundwater storage account, as well as historical water use trends over the past 5-years.

Appendix C

Retail Agency 5-Year Historical Water Use Summary

Appendix D

IEUA & TVMWD Certifications for FY 2009/10

Total to be certified out of Trust Storage = 0.0 This water should be billed at the 2008 UT Replenishment rate of \$258/AF and should not affect Tier 1 or 2

Total to be certified out of DYY/CUP = 33,047.4 This water should be billed at the 2009 UT Basic rate (Tier 1 and 2 apply) with the following credits: Power = \$116.31/AF; O&M = \$18.74/AF; Treatment = \$9.13/AF

Total certified for FY 2009/10 = 33,047.4

Appendix E

Definitions

Desalter Water – Means product water from Chino Desalter I owned and operated by the Chino Desalter Authority (CDA). Groundwater, with high levels of TDS, is treated and distributed to several retail water agencies within the Inland Empire Water Agency (IEUA) service area for potable uses.

Chino Groundwater – Means water pumped from the Chino Basin aquifer and treated by retail water agencies for all potable uses within the IEUA service area.

MWD Imported Water – Means water from Northern California and supplied by the Metropolitan Water District of Southern California (MWD), and water transferred from other groundwater basins to retail water agencies operating within the IEUA service area. All Tier I and Tier II deliveries are included in this category.

Recycled Water – Means Title 22 recycled water produced by IEUA at its water recycling plants for distribution through separate pipelines to retail water agency customers for all non-potable uses.

Surface Water – Means water collected by retail water agencies from mountain runoff and storm flows, which is collected and treated for potable use.

Water From Other Groundwater Basins – Means water produced from other local groundwater basins to retail water agencies operating within the IEUA service area. In this report, “water from other basins” is shown within the category of “other groundwater.”
