

CHINO BASIN DYY OPERATING COMMITTEE MEETING

August 31, 2017
9:00 – 10:30 AM

Meeting Minutes

1. DYY Recharge Status

- a. 7,074.8 AF recharged in month of August, with 6.7 AF losses due to a vegetated blockage.

2. MWD Operations update

- a. MWD had a plant transformer shut off at their Mojave plant. As a result, they are reducing their deliveries for recharge. There may be additional reductions due to Edison power reductions at Devils Canyon mid-September, and less supply availability to us due to anticipated sales from the cyclic storage agreements in place with other agencies that will begin in October. DYY recharge would begin again in November/December timeframe.
- b. As a result of this, discussions about if the Chino Basin would like to take more than the 25,000AF in FY17/18 has been tabled at this time. It will be listed as a recurring discussion item.

3. ASR Injection

- a. MVWD to begin ASR injection on Tuesday, 9/5/17. Below is their Operating Plan to achieve a total of 2,500 AF to assist with 1,2,3 TCE

ASR Injection Operating Plan for Balance of FYE 2018 (in acre-feet)											
Agency	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	June	TOTAL
MVWD	250	250	300	400	400	400	400	100	0	0	2500
											2500

4. Other Items

- a. CBWM's study of evapotranspiration losses during groundwater recharge will be presented to their Board in September.
- b. JCSD requested that in the future imported water recharge be displayed by management zone.

Chino Basin Dry Year Yield Program Certification Tracking

FY	Month	Planned Recharge	Actual Recharge	
FY16/17	June	6,532	6,319	
FY17/18	July	6,532	7,346	
	August	6,321	--	
	September	2,923	--	
	October	1,483	--	
	November	1,222	--	
	December	1,222	--
