

IEUA/IERCA  
**Battery and Solar  
Project Dedication**

Inland Empire Utilities Agency (IEUA) and Inland Empire Regional Composting Authority (IERCA) partnered with Advanced Microgrid Solutions for an advanced integrated renewable energy approach by expanding its existing solar and battery storage system. The system features on-site generation sources and imported electricity in order to optimize renewable power.

Join us in recognizing this unique and innovative approach of employing renewable energy sources to meet the sustainability objectives for both IEUA and IERCA.

**Regional Water Recycling Plant No. 4**  
12811 6th Street, Rancho Cucamonga, CA 91739

**September 19, 2019**  
10:00 A.M.

**RSVP to Andrea Carruthers at**
