

Engineering and Construction Management

Department Mission: The Inland Empire Utilities Agency’s (IEUA) Engineering and Construction Management Department’s mission is to provide project management services to oversee construction of water, wastewater, and energy projects that implement the IEUA’s Capital Improvement Program. Management, inspection, and construction of the project design integrate the latest, most cost-effective technology into the IEUA service area. The department is committed to constructing state-of- the-art facilities and infrastructure to meet the dynamic and growing water importation, recycled water demand, wastewater collection, treatment, and disposal needs of IEUA’s service area with well-managed and cost-effective solutions. The ongoing participation of contractors and consultants makes this possible. IEUA regularly solicits bids and proposals for construction design, equipment pre-purchase, installation, and consulting services. Opportunities for bid and proposal participation can be obtained on www.IEUA.org under “Doing Business with IEUA”.

Budget

IEUA’s Engineering and Construction Management Ten-Year Capital Improvement Program Budget is \$809 million.

Pre-Qualification

IEUA utilizes a prequalification process for bidding all public works projects. Information regarding prequalification can be accessed at

[IEUA Design and Construction Opportunities](#)

How to Bid

IEUA utilizes PlanetBids which allows vendors easy online access to Bids, RFP’s, and RFQ’s.

Registration for PlanetBids is quick, easy and no cost to the contractor. To participate in bid opportunities, register with [PlantBids](#)

Request for Proposal (Design Consulting Engineers)

- Engineering designs are solicited through a Request for Proposal on a project-by-project basis either through an advertisement sent through PlanetBids or to the list of consultants currently on IEUA’s master design service contact list. **The next solicitation to be added to the master list will be Winter 2021.**

Projects Under \$2 million, Emergency and Minor Construction Projects (Contractors)

- Projects are solicited through a pool of pre-qualified contractors. Contractors can be added on a bi-annual basis (odd year) by submitting a prequalification package. Notification regarding when IEUA will be seeking a list of prequalified contractors will be sent to contractors who are registered through PlantBids. **The next solicitation to be added to the master list will be Winter 2021.**

Projects Over \$2 million (Contractors)

- Have a separate prequalification issued based on the project scope. **The next solicitation to be added to the master list will be Winter 2021.**
