

# WATER DISCOVERY WORKBOOK

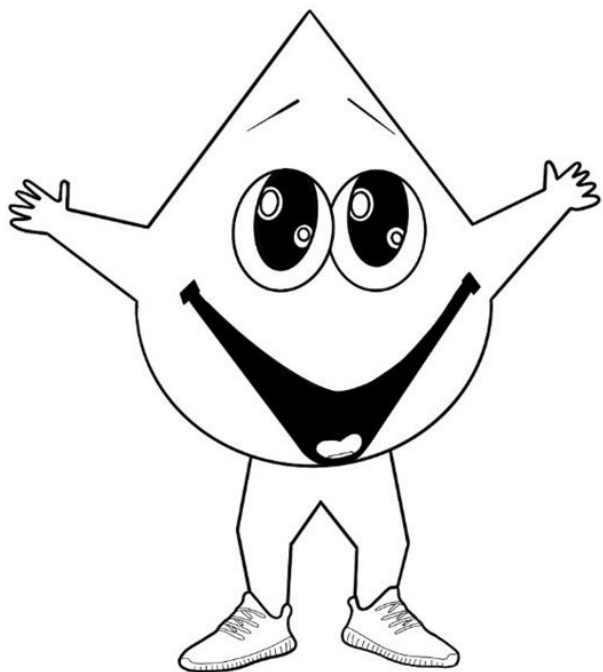

NAME: \_\_\_\_\_

DATE: \_\_\_\_\_

# Welcome to the Water Discovery Workbook!

The Inland Empire Utilities Agency (IEUA) is a regional wastewater treatment agency and wholesale distributor of imported water. IEUA promotes educational programs that focus on teaching water use efficiency methods, origination and sustainability of water resources, and water-saving techniques through the Chino Creek Wetlands and Educational Park (CCW) and the Water Discovery Program.

## Meet our mascots!

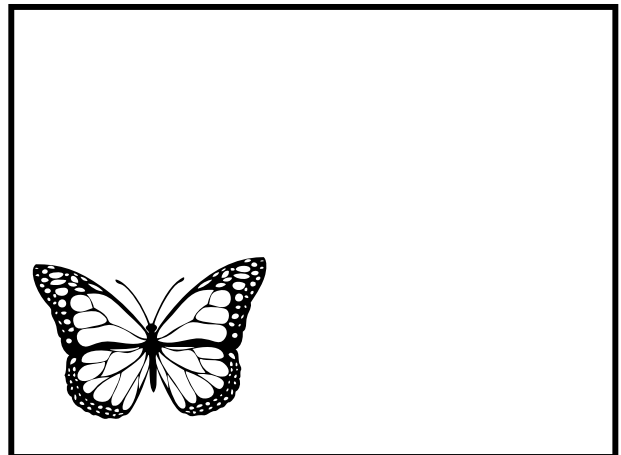

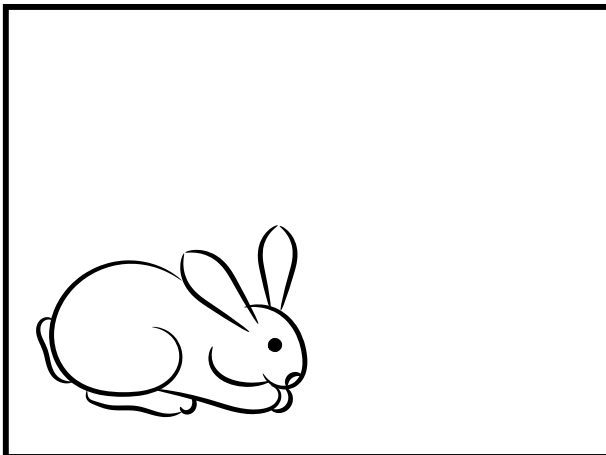

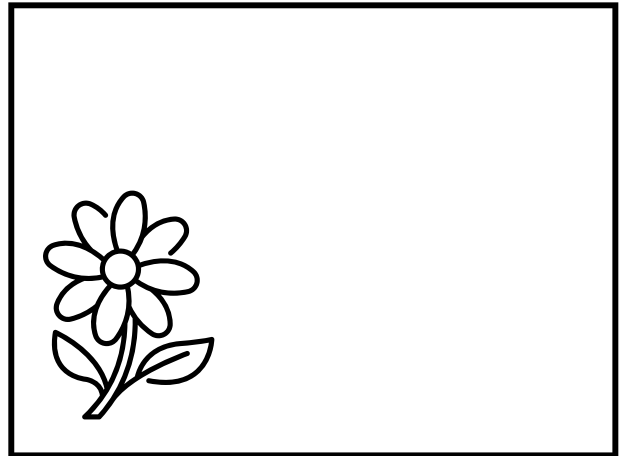

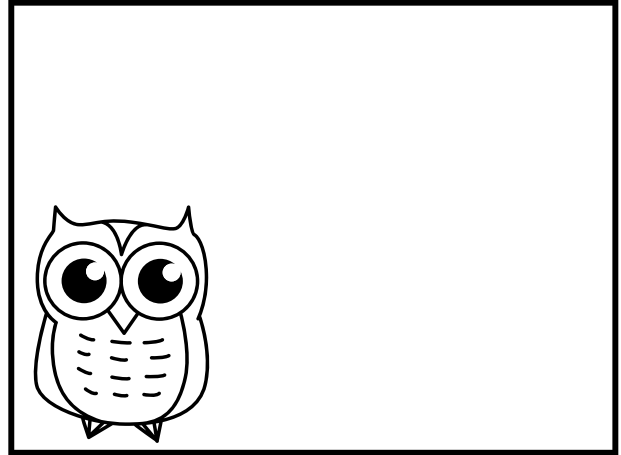

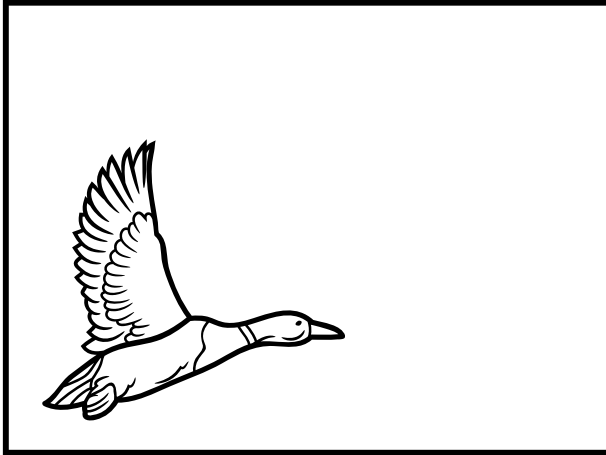

This is Wally, the IEUA mascot!

This is Owlie, the CCW mascot!

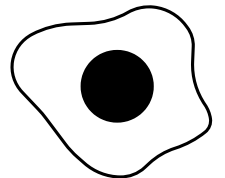

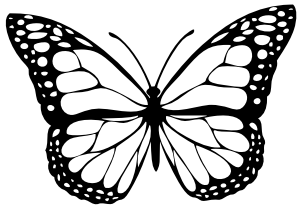

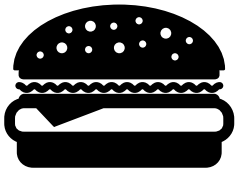

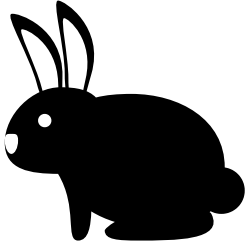

# Living things in the Chino Creek Wetlands

In the boxes below, draw something that each living thing needs to survive:

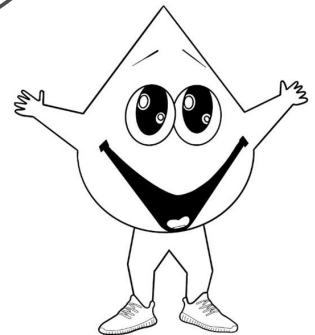

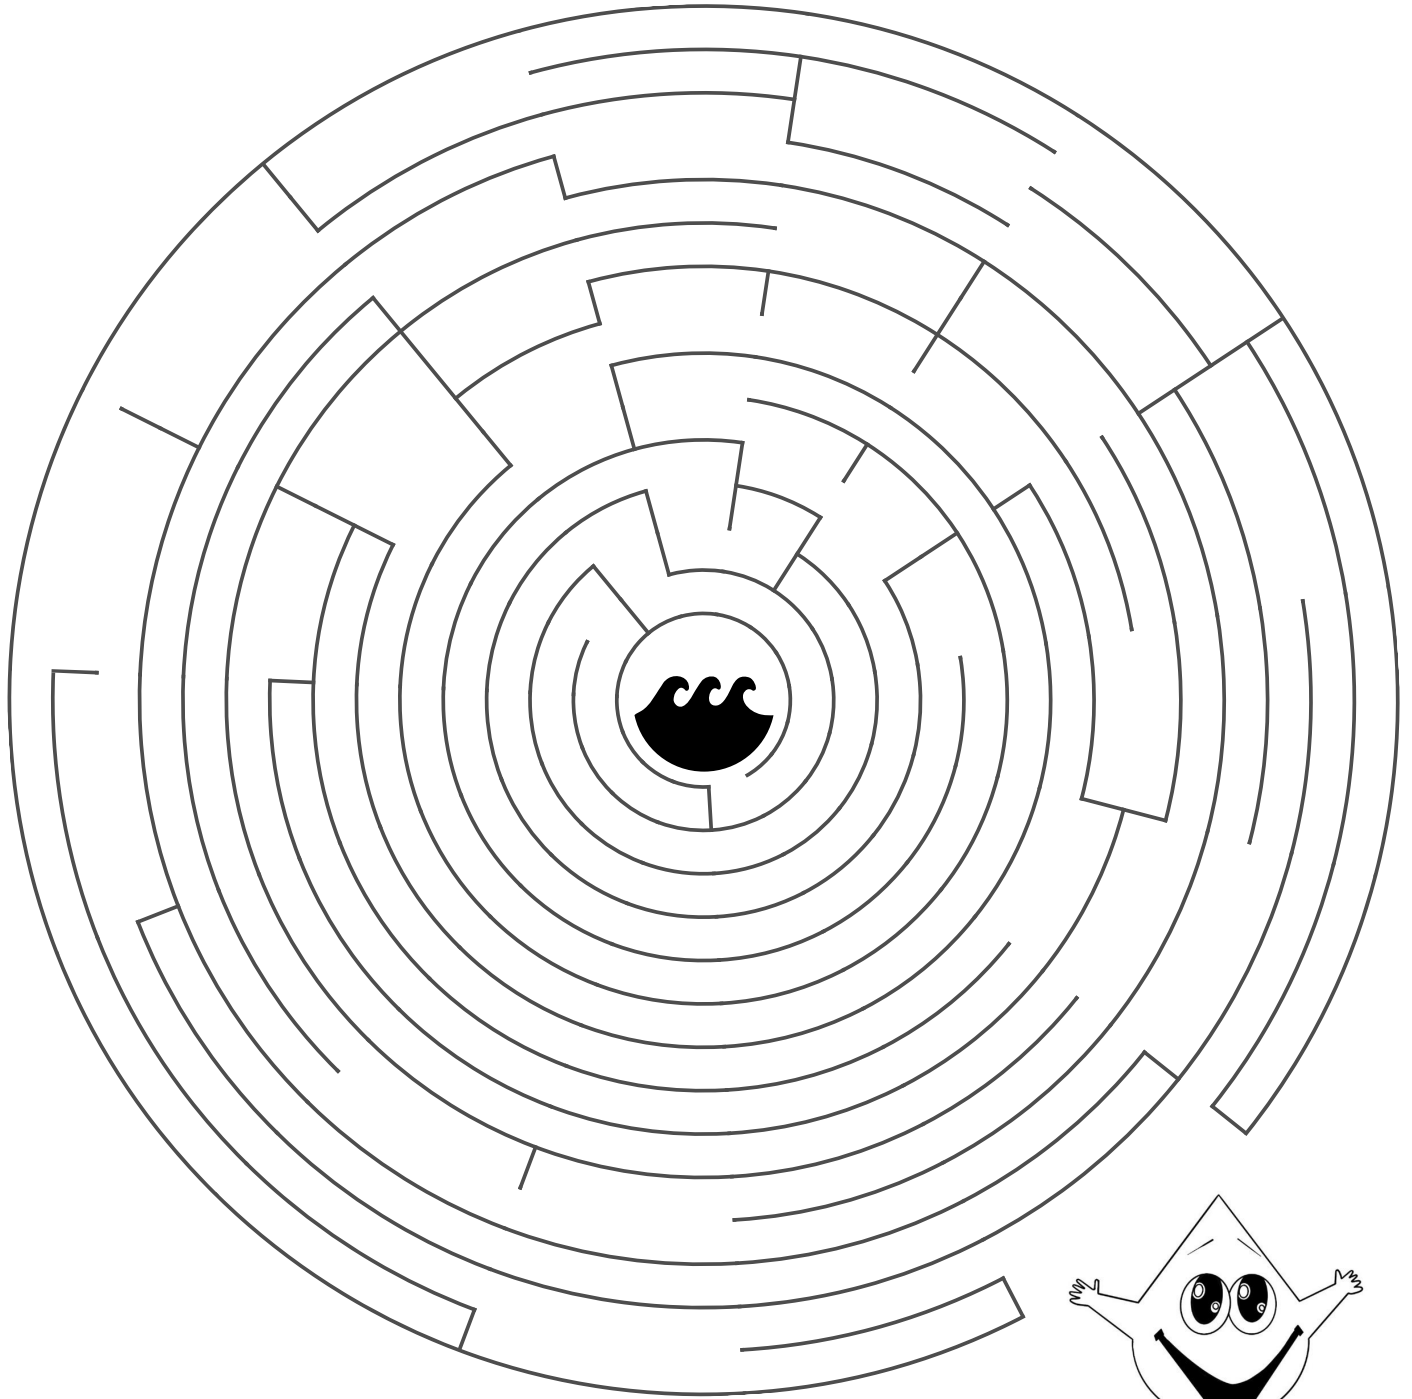

# Help Owlie Choose Her Meal!

Check the boxes of the foods you think Owlie eats.

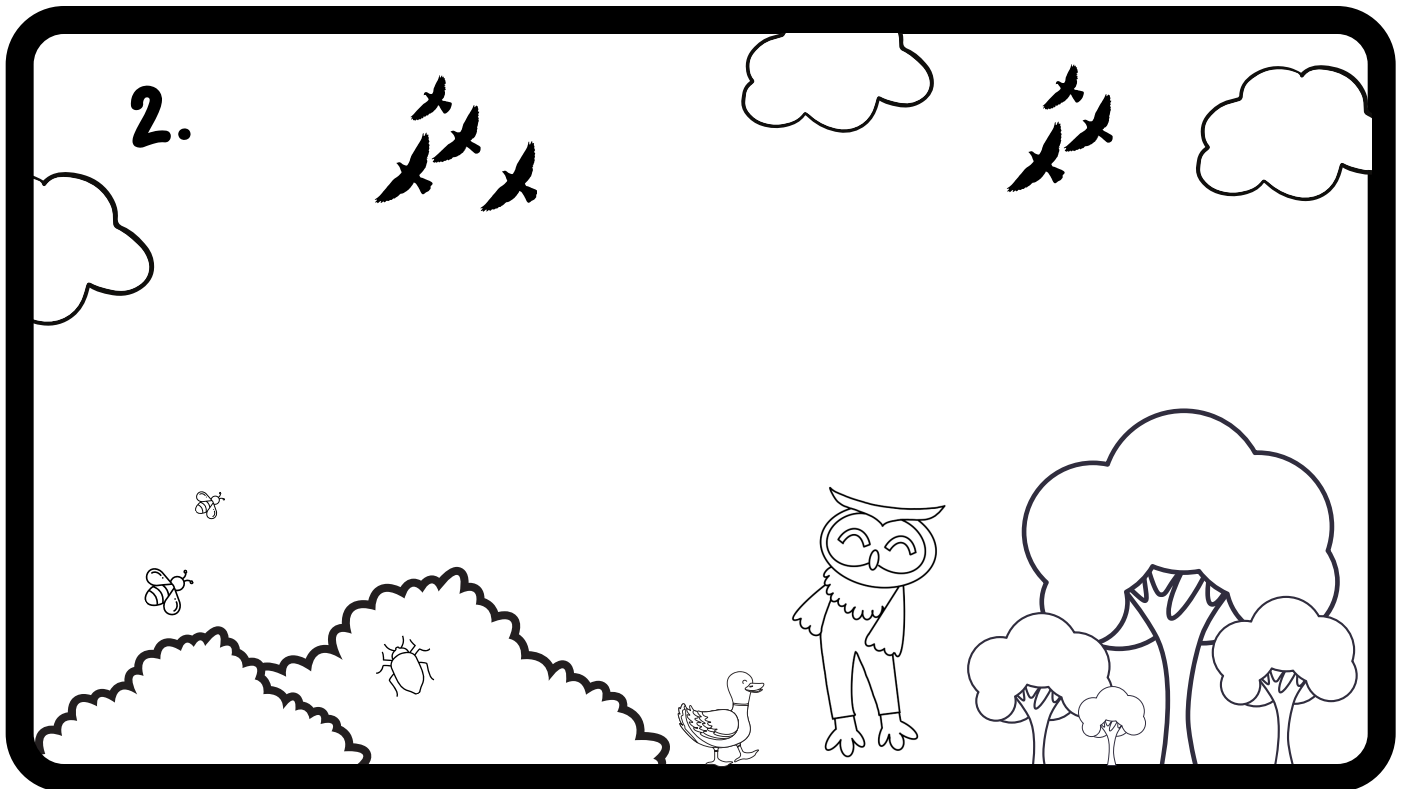

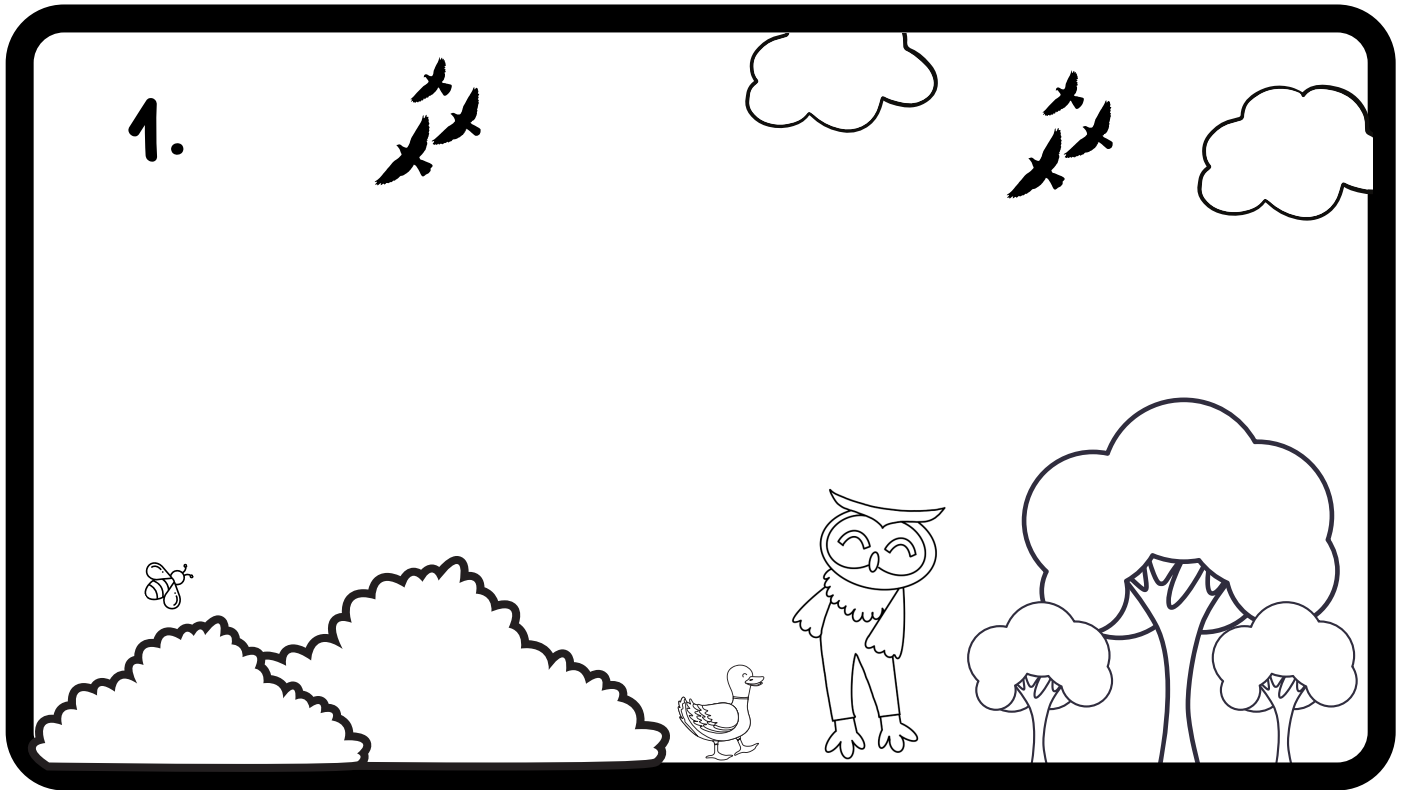

# Can You Help Wally Get to the Ocean?

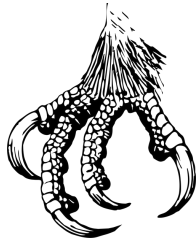

# Spot the Difference

Circle the differences between the two pictures!

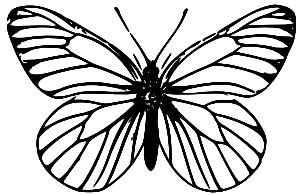

# Animals' Body Parts

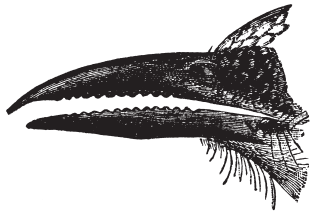

Color and trace the animals' body parts!

claws

wings

beak

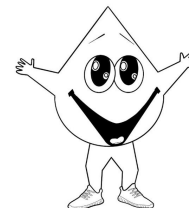

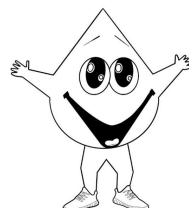

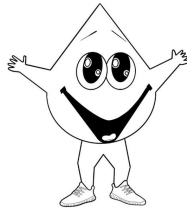

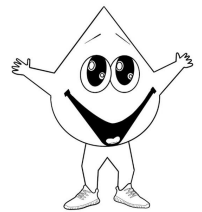

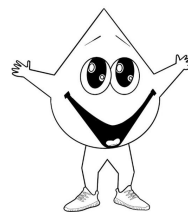

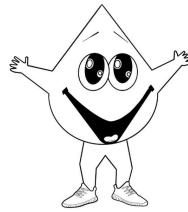

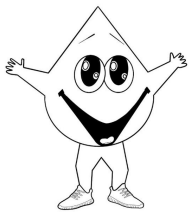

fur

# Counting with Owlie and Wally

How many of Owlie's face do you see below? \_\_\_\_\_

How many Wallys do you see below? \_\_\_\_\_

How many Owlies do you see below? \_\_\_\_\_

# Tracing

Let's trace some of Owlie and Wally's favorite words! Trace the word, then try writing it yourself in the space next to the word.

# Weather with Wally

Look out your window and draw today's weather! Write a sentence below the picture describing what you observed.

Two sets of handwriting lines. Each set consists of a solid top line, a dashed middle line, and a solid bottom line, providing a guide for writing a sentence.

# Color Walk

Take a walk around your neighborhood and draw things you find that match the colors in the boxes below!

# About the Chino Creek Wetlands and Educational Park

---

The Chino Creek Wetlands and Educational Park opened in 2007 and was partially funded by a state grant from the State Water Resources Control Board (SWRCB). It consists of 22 acres and 1.7 miles of trails landscaped with a wide variety of climate appropriate and low-water use plants and features a state-of-the-art irrigation management system. The Park was designed to restore native habitat and natural drainage, showcasing the environmental values of the Prado Basin, the largest riparian forest remaining in southern California. These habitats have many important functions such as: providing a home for many wildlife and plants, filtering pollutants, holding floodwaters back, and storing water.

The Park is open to the public throughout the year to enjoy at their leisure during daylight hours as well as providing an educational experience to students through the Water Discovery Field Trip Program. To learn more about our Water Discovery Field Trip Program, visit our website [ieua.org](http://ieua.org).
