Scope: IEUA is seeking to prequalify construction contractors that are qualified to construct the RP-1 SCADA Migration, Project No EN13016.05. The contractor shall fully review the project and timeline and note how construction completion can be met prior to submitting a qualification package. This should be summarized in their project management approach narrative. The contractor shall submit a P6 schedule of a similar job as part of the contractor's qualification package.

The qualification questionnaire with all supporting documents will be due as noted above. If interested parties are in a joint venture, the questionnaire needs to be filled out by all parties in its entirety and the prime contractor identified clearly. A list of all shareholders, partners or known members at the time of submittal must be included in the qualification package. Subcontractors are not required to submit a qualification questionnaire.

Scope: IEUA is seeking to prequalify construction contractors that are qualified to construct the RP-1 Digester 7 Roof Repairs and Rehabilitation, Project No. EN17042. The project intent is to repair Digester 7 external roof and internal ceiling and wall surfaces in addition to replacement of all specified mechanical piping, valves, supports and other components as detailed in the design drawings. External roof foam shall be completely removed, and positive coating and concrete repair system shall be applied to seal roof cracks and protect the roof from environmental elements. Internal protective coating is also failing and shall be completely removed and a new concrete repair and coating system shall be applied in the designated areas as shown in the design drawings. A good portion of the work takes place inside Digester 7, which is a confined space. It is required that scaffolding be installed inside the digester to perform the necessary internal repairs, piping replacement and coating. All roof manways, penetrations, etc. shall be removed, replaced and/or upgraded shown.

Inland Empire Utilities Agency

Scope: The following work consists of improvements to RP-3 Basin: · Utilize IEUA's drawing to design and construct a reinforced concrete weir with an attached trash net system.

· The trash net system shall be designed with the following in mind:

- o The trash net shall be installed directly into the proposed weir. The nets shall be designed sothat they can be removed for ease of maintenance and clean out.
- o Multiple trash nets shall be installed into the weir to increase trash capture capacity.
- o The trash net system shall be constructed with stainless steel hubs anchored to the concrete weir. The nets shall be commercial grade and UV resistant.
