Scope: The Project will focus on performing the migration of the SCADA system one Process Area at a time for each of the four distinct process areas at RP-1. Each process area will have its own pair of redundant controllers located in their respective server room with remote I/O panels located throughout their respective process area. Control panels within each process area will be upgraded and cutover one by one followed by the decommissioning of the old equipment and relocation of the new equipment to their final location. The four differentiated Process Areas at RP-1 are listed below.

1. Primary Area
2. Secondary Area
3. Tertiary Area
4. Solids and Dewatering Area

### Prospective Bidders for Project Project No. EN17006.00, Carbon Canyon Water Recycling Facility (CCWRF) Asset Management and Improvements Project (IFB-RW-22-013)
