

What is FOG?

FOG

FOG refers to fats, oils, and greases that originate in kitchen households.

Why is it bad?

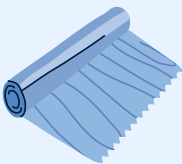

FOG can be harmful if not disposed of properly, leading to sewer backups and household & city plumbing issues.

FOG needs to be disposed of properly

Collect, cool, then (trash) can!

Household items you can use to collect and cool FOG:

**Please use a heat safe container*

Aluminum foil

Coffee canisters

Aluminum food cans

Mason jars

For more info on FOG disposal reach out to your local water provider.

NO WIPES

in the

PIPES

Where does it go?

Is it toilet
paper?

Yes

Is it a
"flushable"
wipe?

Yes

Is it a
tissue?

Yes

Is it a paper
towel?

Yes

Flushing wipes, diapers, tissues, paper towels, or any products other than toilet paper can cause raw sewage to back up into your home. Please only flush toilet paper.
